I'll find the pertinent stuff for you; have you looked through the Sun's archives? There were a couple of stories about the Seskos when we were doing the cleanup and that may be when Bill talked about the tanks.

I would love nothing more than to come see. How is Wednesday, Nov. 7 at 9 a.m. for you?

-Josh

Yes, I have a file. 3 boxes of Sesko abatement. Those were placed there by Bill Sesko years ago, he said they were meant to be used to raise sunken submarines. Since they are on the shoreline, DNR has to remove them; they probably haven't risen to the top of the DNR "derelict vessel" list yet; the only thing they contain is potentially seawater, so it's not like they're in danger of contaminating the shellfish beds. If you want to come up and dig through the Sesko boxes, you can probably find information about them.

I'm off at 3:45 today and won't be back until Monday.

Hi Janet,

Do you get a lot of calls and emails about those big ugly canisters on the beach below the superfund site off Thompson Drive?

I'd like to write something about them. Do you have a file?

Thanks,

Josh
